

The 22 is a complete suite of interior wall accessories that challenge the traditional, tired and ubiquitous cover plate concept. The 22 is designed to “mud” directly into drywall without a visible cover plate or trim. Alternatively, it may be set flush into millwork, marble, glass or any other wall surface. 22 operative components include: power outlets, data/telephone receptacles, cable connectors, line voltage on/off switches, and low voltage intelligent controls. Future items will include: speaker connectors, smoke detectors, thermostats, LED way finders and adjustable spot lights.

All 22.3 operative components are designed to snap fit into any of the 22.2 mounting plates.

MATERIALS

Polycarbonate casing,
electrical components.
